

Readme file:

We include three STATA codes:

- 1) Code-AER-1.do produces Figures 1, 2, and 3, and Tables 1, 3, 4, and 5.
- 2) Code-AER-2.do produces Figure 4, and Tables 2, 6, 7, 8, and 10.
- 3) Code-AER-3.do produces Table 9.

In each case the portion of the code that produces each table and each figure is clearly labeled.

The codes use eight datasets that are in STATA format. Code-AER-1.do uses the first six; Code-AER-2.do uses the seventh and Code-AER-3.do uses the eighth.

data-AER-2.dta
data-AER-3.dta
data-AER-4.dta
data-AER-5.dta
data-AER-6.dta
data-AER-7.dta
| data-AER-8.dta

Different sections of each use these datasets at different times. In all cases it is clear which data sets are being used and merely running the code reproduces all the tables and figures.

data-AER-1.dta through data-AER-6.dta refer to administrative data that is publically available.

data-AER-7.dta through data-AER-8.dta refer to the survey data we collected.
